

- 5) the preceding step/act is repeated until there are no more entries; and,
 - 6) the object itself is now capable of adding behaviors.
-

Please amend the paragraph beginning at page 7, line 17, to read as follows:

The application 202 is, in one embodiment, an application program, such as a word processing program, a web browser program, etc. The application 202 as shown in FIG. 2 is instantiating the object 204 by issuing a CoCreateInstance() command, represented by arrow 208 and as known within the art. The results in the instantiation of the object 204, using the object behaviors as the data 206 thereregarding is stored in the registry 200, as represented by arrow 210.
